

With tool-free installation and a sleek silhouette, the CPU600 offers convenient access to ports and drives. Designed to allow for quick hardware upgrades and repairs, it evolves with the user's technology for easy maintenance and use. This flexible workspace solution fits computers that are 3.5" to 9" wide and 12" to 20" tall.

- Under Desk Mounting. The CPU600 features an under-desk mount with a 360-degree swivel mount for easy access to cables and ports, while also protecting the unit from dirt and other workplace hazards.
- Robust Design. Made of durable materials including steel and aluminum, the CPU600 was built to last. Its strength allows it to accommodate CPUs weighing up to 50 pounds
- Plug and Play. An adjustable mounting plate ensures the CPU is centered and balanced, while Quick Track technology makes installation fast, simple and tool-free.
- Clever design features such as proprietary friction locks and Quick Track make installation and removal for servicing simpler and quicker than any CPU holder on the market.
- Made predominantly of steel, followed by aluminum, the CPU 600 is highly recyclable

Item: CPU Mount
Function: Allow easier access to all sides of CPU
Mounting: Under worksurface, above the base pan, or to the base pan
Finish: -Black Powder Coat
Features: -Small size allows for many possible mounting locations
 -Can be mounted to both steel or laminate console construction
Ergonomics: -CPU can pull out and rotate allowing easier access to both the front of the CPU for interfacing and the rear for wiring.

CPU Mount
WCD-CPU101
