IMPULSE: DUAL SIT/STAND

A WORLDWIDE LEADER IN CONTROL ROOM CONSOLE SOLUTIONS

No matter what your control room application, Winsted offers a command console solution that can be tailored to meet your exact specifications. Let us help you build your ideal control room with modular command consoles and workstations. Our ergonomic control room furniture can be customised to fit both your technical and aesthetic requirements. For the most extraordinary needs we also offer entirely custom control room designs, manufacturing and installation.

Our control room designers combine the disciplines of industrial design, ergonomics and interior design to create workspaces that are both efficient and beautiful. We carefully consider the ergonomic requirements of your operators to design technical furniture that facilitates the complex interactions between personnel, technology and the environment.

From the layout of the control room, to determining the precise placement of every keyboard, monitor and telephone, not a single detail is left to chance. Viewing angles, touch points, heat dissipation and cable management are just a few of the details we consider when designing command consoles and control rooms.

If you're looking for a workplace as unique as the technical environment you work in, look to Winsted. We understand that in complex technical environments like yours there are countless intricate details to consider. From the comfort of your operators, to the aesthetics of your space, our designers will work with you from initial concept to final installation. We will ensure that your solution is perfectly designed to meet your needs in both form and function. Winsted designers have the insight and experience to take your most complex control room from concept to reality.

Custom control room consoles designed to your exact specifications.

CASE STUDY: TCF BANK STADIUM

STADIUM CONTROL CENTER AT UNIVERSITY OF MINNESOTA

There is never a shortage of special events at the University of Minnesota. The stadium at the Twin Cities' university hosts Big Ten college football games throughout the season as well as the NFL's Minnesota Vikings on a temporary basis while the pro team awaits completion of their new stadium, which is currently under construction.

As well as collegiate and professional football, the University of Minnesota TCF Bank Stadium presents homecoming events, freshmen Welcome Week and numerous other celebrations for students, faculty and the community. With such variety in events, the behind-the-scenes control room equipment and personnel have to be flexible and nimble in their operations.

"We're not only producing our in-house broadcasts at four venues, but we're also streaming a good number of those events as well," said Tadd Wilson, scoreboard and video manager at the University of Minnesota. "There are times when we're producing two shows at once – a hockey game from one control room and a basketball game from the other."

The university recently added a fourth broadcast venue location called the Sports Pavilion. The new display required a secondary control room to support the addition, and Wilson and his team were allotted a specific space to house the new setup. One of the biggest challenges to the new space, however, was the unique shape and size.

Wilson and his team selected a Sight-Line console from Winsted's Prestige line of products, which is ergonomic, modular and adaptable, so the operators have the flexibility and adaptability to monitor viewing angles and sight lines as well as maintain a level of personal comfort.

"The elegant look of the consoles really plays a role because we conduct so many tours throughout the year, and people are always coming through the control rooms," Wilson said. "The aesthetic finish on the consoles is appealing, and Winsted added our logo to the sides, which is a nice touch. The room is comfortable, functional and the look of the consoles really makes our room stand out."

Winsted offers a complete selection of video production consoles and furniture.

WINSTED BROADCAST PARTNERSHIPS

Winsted is a true project partner and we pride ourselves on going above and beyond. We can provide Building Information Modeling (BIM) files for Revit®, full CAD drawings in multiple views, photo-quality color renderings of the console design and even animated “walk-through” videos of the proposed installation.
